

ESSENCE SLEEP

WHERE DREAMS COME TRUE

www.healthcareeurope.rs

As regional leaders in memory and regular foam production, we offer a broad spectrum of high-quality sleeping products.

The trust our clients give us is based on absolute dedication to every segment of our business. It starts with an idea, an offer, clear-cut deals, respecting deadlines, and ends with the final products themselves.

Together with our mother company HealthCare Co., Ltd, HealthCare Europe continues growing. We develop business and production processes without losing sight of our top priority - the possibility to give an adequate solution to all sleeping demands at every moment. Next to top experts, a growing number of employees, and the most advanced technology, we strive for excellence with utmost dedication.

The quality of our products is confirmed through numerous certificates. All of which adhere to the highest international standards and regulations.

By now, we have made several millions of different products. We've worked with hundreds of bigger and smaller clients, as well as dozens of sought-after brands in the sleep industry. All this to achieve one collective feeling – satisfaction.

ABOUT US

OUR CERTIFICATES

WHY ESSENCE SLEEP?

ESSENCE SLEEP® products have acquired all necessary certificates, including CertiPUR®, OEKO-TEX®, and many others. All our foam types comply with the most demanding standards and regulations applied in different markets.

Except for product certificates, our company also complies with the BSCI Code of Conduct. The BSCI certificate confirms that our company is committed to the principles set out and meet, within its sphere of influence, their responsibility to respect human rights.

OEKO-TEX® SECURITY IS CERTAINLY A GOOD FEELING!

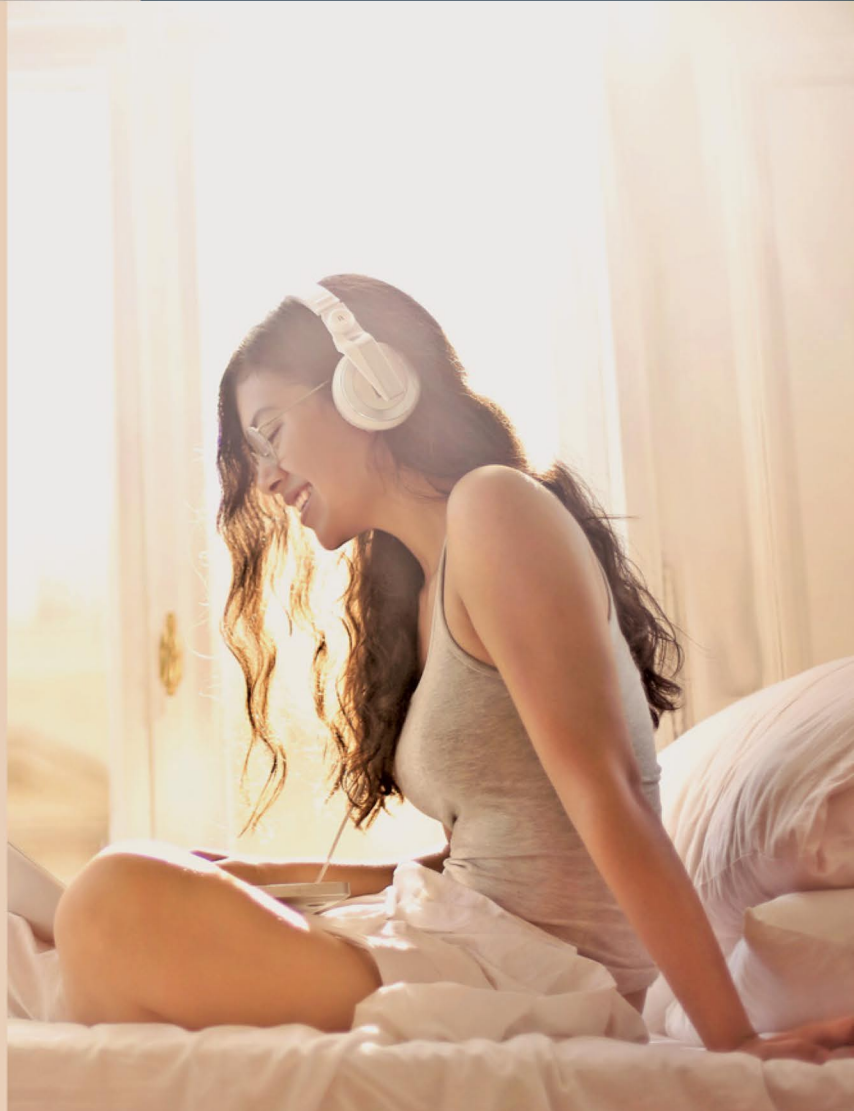

ESSENCE SLEEP® products have an OEKO-TEX® label. They are free of harmful substances that may pose a health issue. After all, we spend a third of our lives sleeping. That is the time that should be naturally as revitalizing and healthier as possible for us. During our lifetime, human bodies are in constant contact with textiles used in various forms of clothing, from linen to fabrics, for the purpose of interior decoration in our homes. Isn't it good to know that textiles - whether made of natural or synthetic material - do not have any substances that could harm our health? When you go shopping, be 100% sure to look for a safety and transparency label that says "Reliable textile" tested for harmful substances according to OEKO-TEX® standard.

ESSENCE SLEEP

MISSION

ESSENCE SLEEP® brand is dedicated to obtaining the best sleeping experience. By making affordable and high-quality memory foam mattresses, toppers, and pillows, we create the highest value for our customers.

ESSENCE SLEEP

VISION

By making quality memory foam mattresses affordable, we make the world a better place, one sweet dream at a time.

HEALTHY SLEEP ABOVE ALL

The microclimate in which we sleep is one of the most important conditions for remedial rest and health. In addition to a dry environment with a constant temperature, contributing to uninterrupted sleep, it also protects the sleeper from cold and other ailments. Besides providing the best anatomical support, ESSENCE SLEEP® mattresses also offer a range of other benefits that positively affect health. They offer carefully selected fabrics, whose performance and composition protect you from bacteria and mites during sleep, covers that are easy to clean and enhance breathability for temperature regulation.

XIA Mattress

Sleep thermal comfort is one of the critical factors affecting sleep quality. Healthy sleep containing cycle position change is considered to regulate body temperature. Thanks to the innovative cooling technology, we created the **XIA** thermoregulated mattress. Because the technology keeps your body temperature balanced, the **XIA** model will respond dynamically to temperature changes.

height
18 cm

GEL Memory foam

Optimal support

Cooling effect
fall asleep faster

Antiallergic and
antibacterial preferences

AVAILABLE IN STANDARD DIMENSIONS:
200x 80 (90,140,160,180) cm
190x 80 (90,140,160,180) cm

1

GEL MEMORY FOAM (4cm) with infused gel particles is a product of innovative "Cooling" technology. Besides having all features of memory foam, it regulates body temperature by absorbing excess heat released during sleep. It conforms to your body to reduce tossing and turning and promote deep sleep. Its open-cell structure allows the material to breathe. That way, there is no need for additional perforations to provide airflow. The gel particles infused into this foam with its open cell structure provide numerous benefits. The mattress comes with a mild cooling effect, enhanced breathability, an unfavorable environment for the development of microorganisms, and optimal thermoregulation. It also prevents excessive sweating and keeps your body temperature balanced during sleep.

2

CONVENTIONAL PU FOAM (14cm) is an exceptionally durable and airy but elastic material. The elasticity allows it to stand pressure and weight without permanent deformity. At the same time, it provides ideal support to the body during sleep. Besides providing superb support, the foam layer ensures a regenerative, good night's sleep.

10

DAXO Mattress

With its specially designed core from several foam types, the **DAXO** mattress helps by relieving pressure points. Consequently, it enables muscle relaxation, ensuring a relaxed and ultimate comfortable sleep experience.

height

Optimal support

For better comfort cover
is quilted with hollowfiber

AVAILABLE IN STANDARD DIMENSIONS:
200x 80 (90,140,160,180) cm
190x 80 (90,140,160,180) cm

1

300-gram HOLLOWFIBRE (1cm) quilted in the mattress cover.

2

HR FOAM (4cm) contours to the body exceptionally well. Its cell structure enables extreme elasticity and optimal supporting force. This type of foam distributes pressure across an block the transfer of motion from one sleeper to another. This characteristic is the most valuable mattress feature for those who share a bed with a restless partner. The elasticity of HR foam helps to prolong the comfort life of the mattress. The more resilient the foam is, the longer you can expect the mattress to retain its long-lasting level of comfort.

3

CONVENTIONAL PU FOAM (15cm) is an exceptionally durable and airy but elastic material. The elasticity allows it to stand pressure and weight without permanent deformity. At the same time, it provides ideal support to the body during sleep. Besides providing superb support, the foam layer ensures a regenerative, good night's sleep.

COMFORT Line

ESSENCE SLEEP

Premium comfort is a requirement for quality sleep. By combining innovative and proven materials, we've created a mattress collection that is synonymous with comfort.

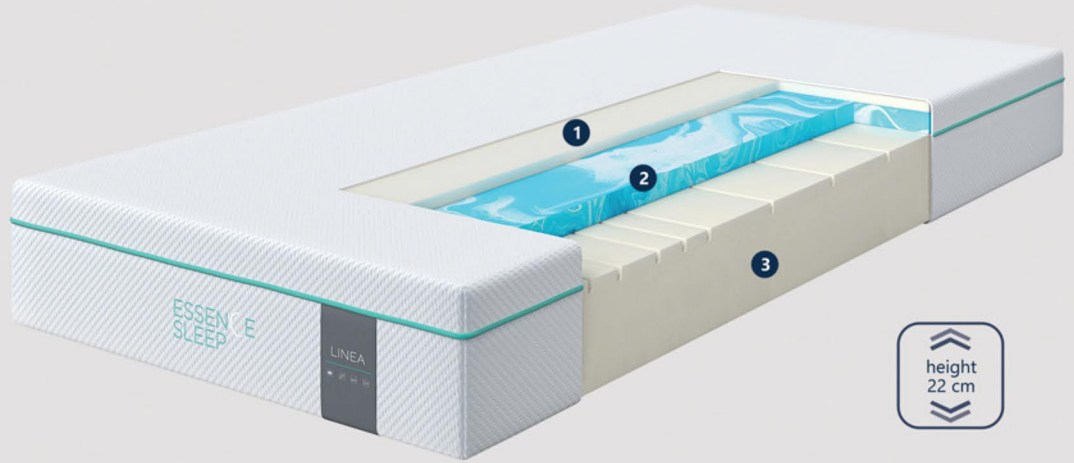

WHERE DREAMS COME TRUE

LINEA Mattress

With the **LINEA** mattress, you can enjoy a good night's sleep and wake up feeling refreshed and ready for the day. It's created to help your body recover from a day of busy activities. The mattress provides the right level of support and comfort to relieve the pressure points during the night. It's designed to adapt to body weight, shape, and sleeping style. With its specially designed core, this mattress will provide the ideal level of comfort and support.

HR and Memory foam

Enhanced breathability

Antiallergic and antibacterial preferences

For better comfort base layer is CNC convoluted

AVAILABLE IN STANDARD DIMENSIONS:
200x 80 (90,140,160,180) cm
190x 80 (90,140,160,180) cm

1 AIRCELL® MEMORY FOAM (2cm) is one of the most popular and innovative types of foam due to its features. What makes it unique is its "slow recovery" effect (slow recovery after pressure) and great adaptability to the contours of the body, its weight, and temperature. These characteristics are what reduce the transmission of movements during sleep. They also evenly distribute the pressure to the body at all support points. This, in turn, helps prevent pain and stiffness.

2 HR FOAM (4cm) contours to the body exceptionally well. Its cell structure enables extreme elasticity and optimal supporting force. This type of foam distributes pressure across an entire surface. It helps mattresses block the transfer of motion from one sleeper to another. This characteristic is the most valuable mattress feature for those who share a bed with a restless partner. The elasticity of HR foam helps to prolong the comfort life of the mattress. The more resilient the foam is, the longer you can expect the mattress to retain its long-lasting level of comfort.

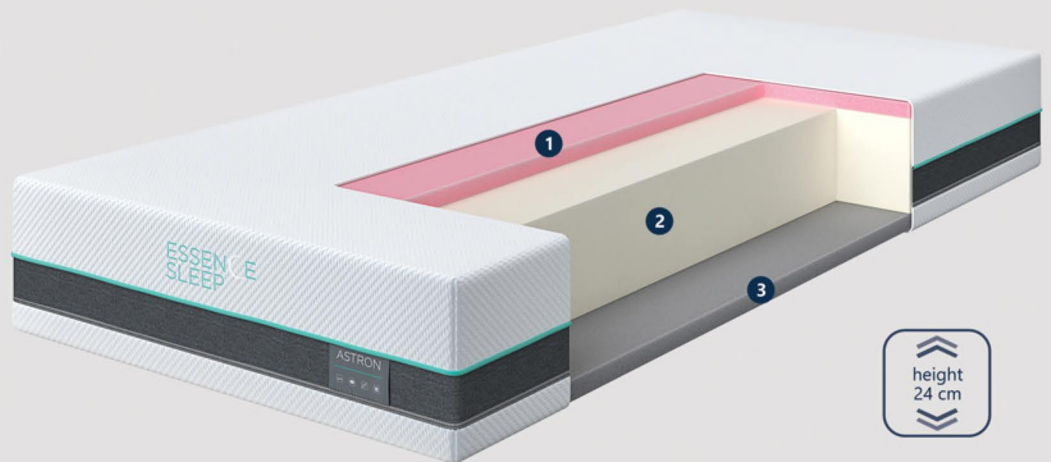

3 CONVENTIONAL PU FOAM (16cm) is an exceptionally durable and airy but elastic material. The elasticity allows it to stand pressure and weight without permanent deformity. At the same time, it provides ideal support to the body during sleep. Besides providing superb support, the foam layer ensures a regenerative, good night's sleep. For better comfort base layer is CNC convoluted.

www.healthcareurope.rs

ASTRON Reversible Mattress

Pressure point relief is a clear sign of comfort. With its carefully designed core, the **ASTRON** mattress provides the best sleep surface for your body. The big pluses of this model are that it comes with better blood circulation and contouring support. It is anatomically adaptable to the human body. It's what secures proper body position during sleep. It's also what makes it especially recommended for people experiencing back pain.

Smart™ foam

Charcoal memory foam

Enhanced breathability

Improved support

Reversible mattress two comfort levels

AVAILABLE IN STANDARD DIMENSIONS:
200x 80 (90,140,160,180) cm
190x 80 (90,140,160,180) cm

1 SMART™ FOAM (3cm) replicates the feeling of latex, is supportive and supple to give you a great night's sleep. The Smart™ Foam top is soft and comforting. It conforms to the contours of your body to reduce tossing and turning and promote deep sleep. Its open-cell structure allows the material to breathe, so there is no need for additional perforations to provide airflow.

2 CONVENTIONAL PU FOAM (18cm) is an exceptionally durable and airy but elastic material. The elasticity allows it to stand pressure and weight without permanent deformity. At the same time, it provides ideal support to the body during sleep.

3 CHARCOAL MEMORY FOAM (3cm) is innovative memory foam. It's known for its impressive absorption properties. It helps reduce trapped body heat, humidity, and odor control and is ideal for sensitive skin. Because of its features, this foam type is a good option for those who suffer from allergies to dust mites.

ESSENCE SLEEP

Night after night, experience the unique features and unsurpassed comfort of the mattress from our top-quality collection. Made from the highest quality materials obtained by using high technology.

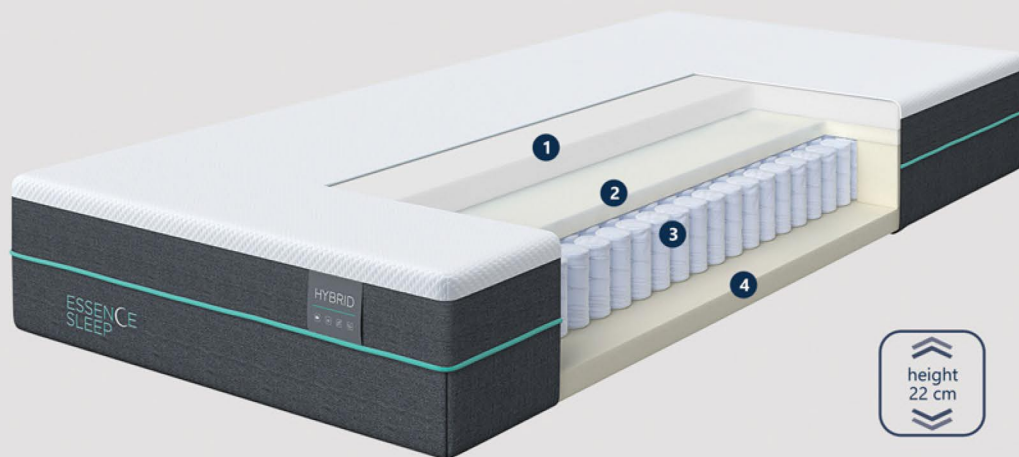

WHERE DREAMS COME TRUE

ESSENCE SLEEP

PILLOW COLLECTION

www.healthcareurope.rs

20

ESSENCE Classic Pillow

A classically shaped memory foam pillow is an ideal solution for all side sleepers, especially for those who prefer an optimal balance between support and comfort. Memory foam cells distribute air to each other due to weight pressure. They adjust perfectly to body contours. Consequently, it relieves the head and neck from tension and stiffness sensation.

Memory foam

Pressure and pain relieving

Enhanced breathability

Antibacterial and antiallergic preferences

Optimal head and neck support

AVAILABLE DIMENSIONS:
60x40x12cm

AIRCELL® MEMORY FOAM is one of the most popular and innovative types of foam due to its features. What makes it unique is its "slow recovery" effect (slow recovery after pressure) and great adaptability to the contours of the body, its weight, and temperature. These characteristics are what reduce the transmission of movements during sleep. Its key feature is that it evenly distributes the pressure to the body at all support points. In turn, this helps prevent pain and stiffness. Memory foam provides a phenomenal feeling of comfort without excessive stress on the body. It has also been proven to improve blood circulation during sleep.

ESSENCE

Contour Pillow

The well-known contour pillow gives sleep a whole new dimension. Made of Air Cell memory foam, this pillow is very comfortable and airy. It's optimized for keeping the spine in proper alignment during the night. An ergonomically contoured pillow core gives ideal support for the head and neck in just the right places. The carefully planned design provides pain and tension relief. It helps with decreasing headache and neck soreness sensation. This pillow allows neck and shoulder muscles to relax while being fully supportive at the same time. It is an excellent choice for all back and side sleepers.

-  Memory foam
-  Pressure Relieving
-  Ergonomic support
-  Antibacterial and antiallergic preferences

AVAILABLE DIMENSIONS:
50x30x10/7cm
60x40x11/9cm

AIRCELL® MEMORY FOAM is one of the most popular and innovative types of foam due to its features. What makes it unique is its "slow recovery" effect (slow recovery after pressure) and great adaptability to the contours of the body, its weight, and temperature. These characteristics are what reduce the transmission of movements during sleep. Its key feature is that it evenly distributes the pressure to the body at all support points. In turn, this helps prevent pain and stiffness. Memory foam provides a phenomenal feeling of comfort without excessive stress on the body. It has also been proven to improve blood circulation during sleep.

22

ESSENCE

Shredded Pillow

Traditional pillow type suitable for all sleeping positions. Memory foam flakes in the pillow core equally disperse pressure and prevent the creation of critical pressure points that may cause pain and stiffness. Shredded memory foam circulates more air and provides life-long comfort. The softness of the pillow depends on the type of foam in the core, memory, or "smart" foam. The inner cover is quilted with 0,8cm foam foil. It provides additional comfort and more pleasant sleep.

-  Memory foam
-  Optimal head and neck support
-  Enhanced breathability
-  Antibacterial and antiallergic preferences

AVAILABLE DIMENSIONS:
60x40cm and 70x50cm

AIRCELL® MEMORY FOAM is one of the most popular and innovative types of foam due to its features. What makes it unique is its "slow recovery" effect (slow recovery after pressure) and great adaptability to the contours of the body, its weight, and temperature. These characteristics are what reduce the transmission of movements during sleep. Its key feature is that it evenly distributes the pressure to the body at all support points. In turn, this helps prevent pain and stiffness. Memory foam provides a phenomenal feeling of comfort without excessive stress on the body.
